

## 5.7L Vortec marine engine-SILVER Package (1967-2008 replacement)

Model : 5700-ISilver

Manufacturer : GM Marine

This BRAND NEW 2008 5.7L Vortec SILVER package is great for those that need a little more than just a base engine or long block but yet still don't quite need a complete engine package. This silver package will fit, bolt in, and work in nearly all 5.0L and 5.7L marine applications from 1986-2008 with no modifications. (Pre-1986 applications will need to update the engine coupler and occasionally the fly wheel). If you have an existing Mercruiser Alpha One, Volvo Penta, OMC, or any other outdrive or inboard transmission, NO modifications or gear ratio changes are required when installing this 5.7L Vortec engine package. This 5.7L SILVER package is rated at 315 hp @ 5000 RPM at the crank and comes with the following components:

- 2008 5.7L Vortec marine engine - Cast iron block, teflon coated pistons, high flow Vortec cylinder heads with sintered powdered-metal exhaust valve seat inserts, high performance GM marine roller cam shaft with roller valve lifters. These are just a few of the features that add up to more horsepower, greater low end torque, excellent durability, and longevity. All marine engine manufacturers (Mercruiser, Volvo Penta, Marine Power, Indmar, PCM, etc) use this exact 5.7L Vortec engine because of its excellent performance and proven durability. 100% of your wakeboard and ski boats such as Ski Nautique, Malibu, Mastercraft, Tige, Supra, Moomba, etc use this exact 5.7L Vortec engine.
- Aluminum hi-rise intake manifold - this is bronzed lined and made for marine applications. Michigan Motorz uses this 4 barrel intake manifold for its lightweight durable design and 15hp increase over standard intake manifolds. This manifold is made for fresh water and the harshest salt water environments.
- Holly 4150 or 4160 marine carburetor - four barrel with electric choke, 600 cfm, 30cc accelerator pump, "J" tubes, etc (U.S. Coast Guard approved), one-piece flexible fuel line, Mercruiser throttle linkage kit, flame arrestor with breather tube and pcv hookup.
- Electric fuel pump kit - a low pressure 4-7 psi electric fuel pump (U.S. Coast Guard approved), delivers the right amount of fuel to the carburetor. Also includes fuel pump bracket and oil pressure switch. Loss of oil pressure will automatically shut off the fuel pump thereby preventing gas vapors from accidental ignition and preventing possible damage to the engine.
- Delco Voyager ignition kit - Voyager distributor with Electronic Spark Timing (EST), High energy ignition coil, 8mm marine spark plug wires and spark plugs, shift interrupt wire, timing tool, and other misc wires to easily connect to any existing marine engine wire harness. (U.S. Coast Guard
